

FROGCOAT™

FROGCOAT™ COATINGS

ADVANCED COATINGS FOR ARTISTIC APPLICATIONS

FROGCoat™ is a full line of coatings and related materials for sculptural, architectural and mold making applications that use foam as their foundation. For sculptural and themed environment applications, these coatings provide the durable finish your products need to stand up to the elements, and they provide a look that stands out from the crowd. For mold making applications, FROGCoat™ Coatings let you create intricate, durable molds that produce consistently crisp and beautiful end products. FROGCoat™ Coatings are the start to a perfect finish.

WITH FROGCOAT™ COATINGS YOU GET...

- **Specialized coatings for specialized applications** – FROGCoat™ Coatings give you proven coating products for your artistic applications. There's no sorting through hundreds of irrelevant products or working with coatings (or suppliers) not built for your needs. Whether you need spray coatings, in-mold coatings or mold making materials, FROGCoat™ delivers the right coating for your project.
- **One stop shopping** – With Streamline, you get all of the equipment and coatings you need to build your competitive advantage, without the runaround that comes with multiple suppliers. Rather than trying to create a piecemeal solution, our equipment and coatings have been designed and tested together, so you get a solution that works – from start to finish.
- **Expertise and experience** – FROGCoat™ Coatings are backed by a team with real world expertise and hands-on experience, both with the coatings we offer and with the kinds of projects our clients produce. We support businesses around the world in these applications, so we understand how our products can work for you.
- **Training and support** – We've translated our expertise into a support structure that can help you succeed – not just with applying coatings, but with taking your business to new creative levels. Our comprehensive training programs give you the knowledge you need to take projects from concept to completion - and you can rest assured that we'll be there to help when you need us.

THE FROGCOAT™ COATINGS LINE-UP INCLUDES...

FROGCoat™ 100 SERIES – SPRAY COATINGS

FROGCoat™ 100 Series Spray Coatings include coatings and primers that are applied to foam pieces to create a durable and impact-resistant shell in both smooth and textured finishes. With a number of polyurethane and polyurea coatings to choose from, you can select the product that works best for your application.

FROGCoat™ 200 SERIES - IN-MOLD COATINGS

FROGCoat™ 200 Series In-Mold Coatings include coatings and primers that are applied directly into molds and used to replicate rock, coral, tree bark, skins and a range of other surfaces. De-molded parts exhibit great detail and realism and are fully ready for painting and finishing.

FROGCoat™ 300 SERIES - MOLD MAKING MATERIALS

FROGCoat™ 300 Series Mold Making Materials give you the flexible coatings you need to create durable, detailed molds for concrete, plaster, fiberglass and a range of other materials. Combined with Streamline's QuickMold™ process for creating molds, these coatings can boost the efficiency and creativity of your mold making processes.
